

Vocabulary

Tools and Strategies

Why Teach Vocabulary

- Vocabulary deficits are a major cause of problems with reading comprehension
- Students with low SES have a fraction of the vocabulary of those with higher SES
 - Entering kindergarten with half the vocabulary of a high SES student, and adding new words at a much slower rate.
- Context is not enough – explicit instruction of vocabulary is also needed

How to Introduce Vocabulary

- Limit number: 5-20 words at a time
- Provide student-friendly definitions
- Provide context clue sentences
- Create activities that will engage students in dealing with the words' meaning
 - Writing which connects to personal experiences
 - Graphic organizers, thinking activities, and games
- Use multiple strategies, repeated exposures
12 exposures enough for most students, but others require 20 or more

Some Tools and Strategies

- Vocabulary Cartoons
- LINC'S Index Cards
- Synonym/Antonym Fill-in-the-blank
- Frayer Model
- And many more!

Vocabulary Cartoons

LINCS Vocabulary Strategy

(Ellis, 2000)

**Students create flash cards
with their own word-sound and
picture links**

Word → Reminding Word → Reminding Story → Picture → Definition

Creating LINCS Study Cards

1. Draw a line across the middle of both sides of an index card.
2. Write the word on the top half of one side. Then circle it.

3. Write the parts of the definition you need to remember on the top of the other side.

Creating LINCS Study Cards (cont.)

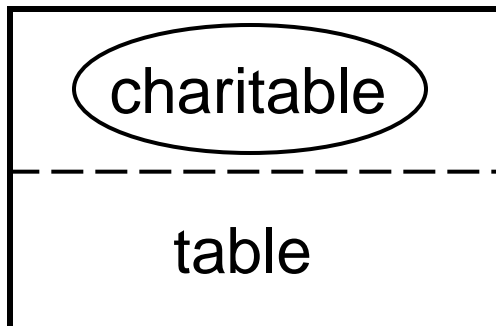

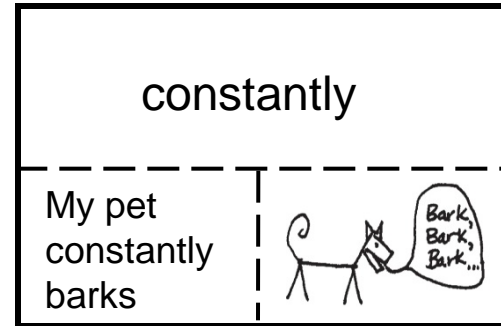

4. Write the Reminding Word on the bottom of the first side.

5. Write the LINCing Story and draw the LINCing picture on the bottom half of the second side.

LINCS Study Cards – More examples

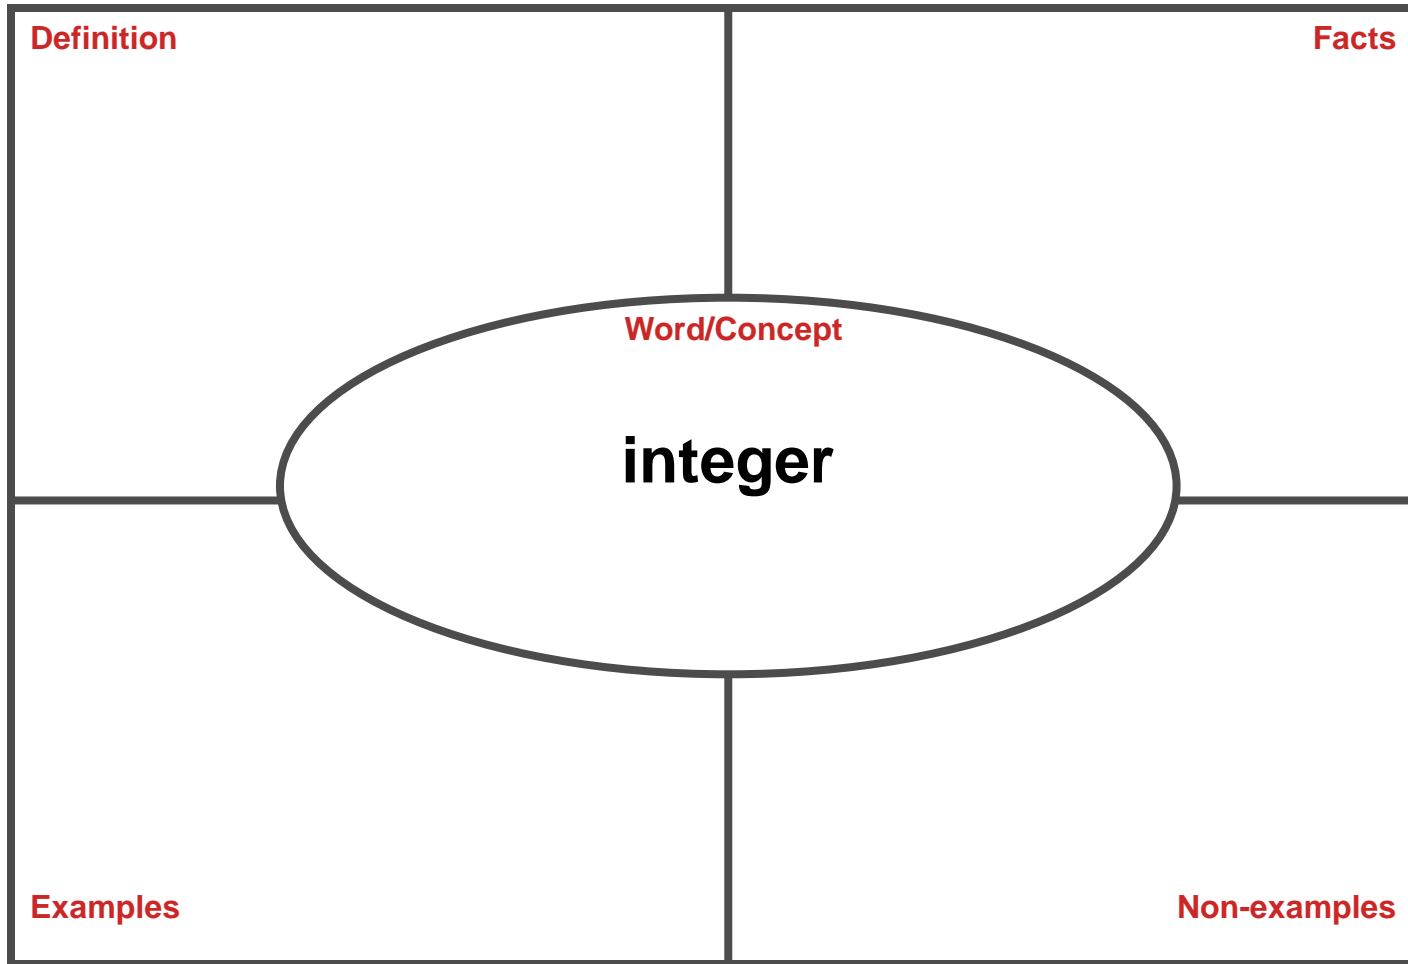

Synonym/Antonym

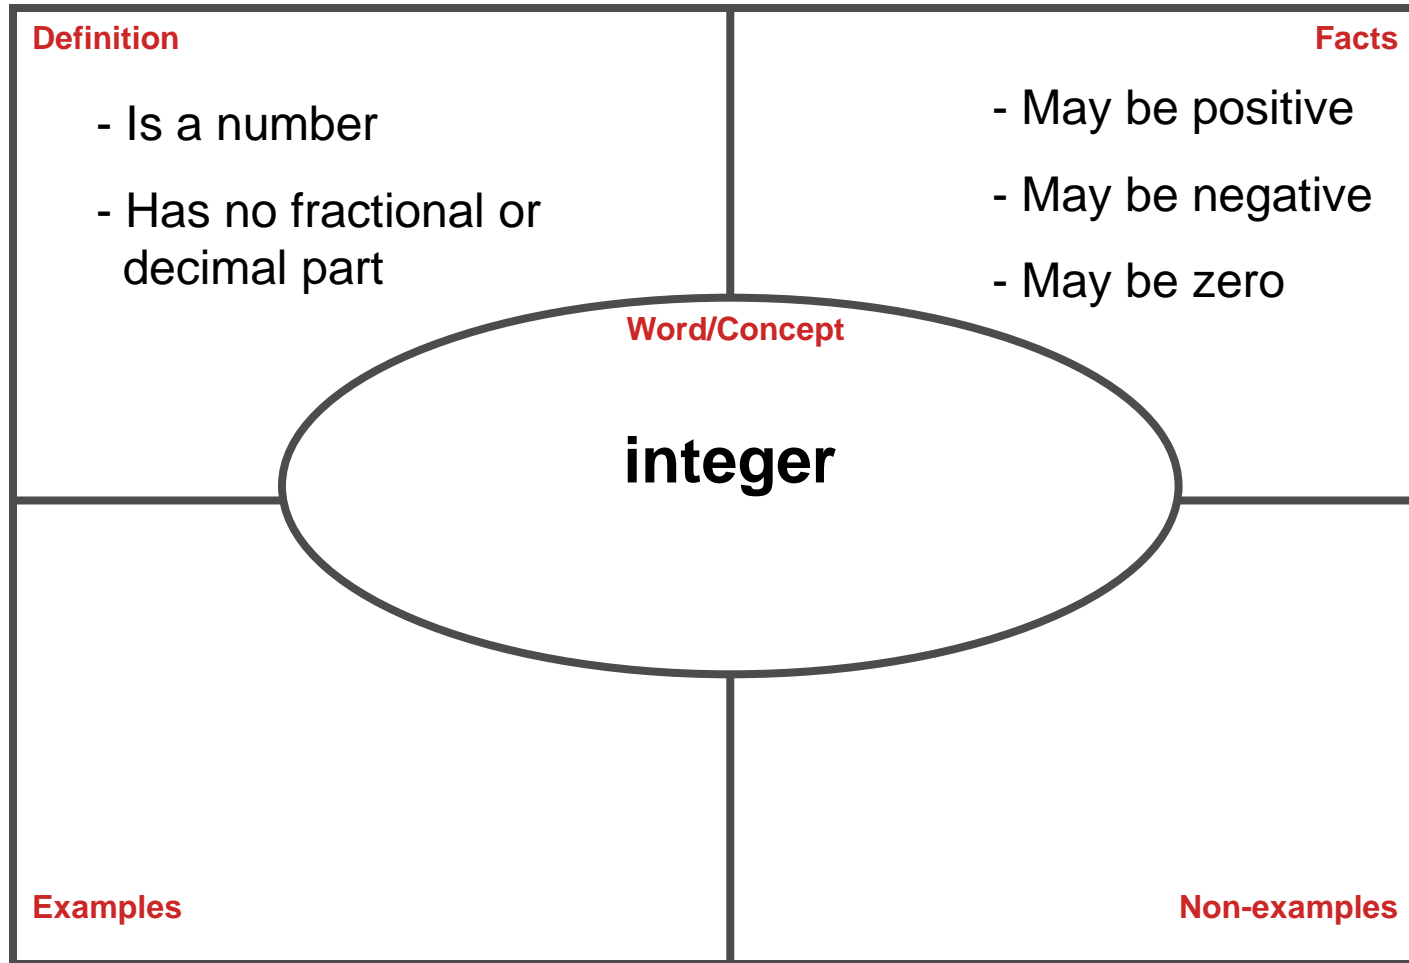

Fill-in-the-Blanks

Word	Antonym	Synonym
domestic	for_ign	_____
prosperity	p_v_rty	_____
revenue	p_ym_nts	_____
rural	urb_n	_____
subsequent	prev_ous	_____

Frayer Model

Frayer Model

Frayer Model

Definition	Facts
<ul style="list-style-type: none">- Is a number- Has no fractional or decimal part	<ul style="list-style-type: none">- May be positive- May be negative- May be zero
Word/Concept integer	
<p>0</p> <p>-4</p> <p>781</p>	<p>0.2</p> <p>-1.3</p> <p>$\sqrt{3}$</p> <p>π</p> <p>$\frac{2}{3}$</p>
Examples	Non-examples
